THE magnificent Twin-screw Steamships of this Line pass through the famous INLAND SEA OF JAPAN, and usually make the voyage YOKOHAMA TO VANCOUVER (B.C.) in 12 DAYS, saving THREE DAYS to a WEEK in the Trans-Pacific journey, and make connection at Vancouver with the PALATIAL OVERLAND TRAINS of the CANADIAN PACIFIC RAILWAY which leave daily, and cross the Continent FROM THE PACIFIC TO THE ATLANTIC WITHOUT CHANGE. Close connection is made at Montreal, Quebec, Halifax, New York and Boston with all Trans-Atlantic Lines, which passengers to Great Britain and the Continent are given choice of. Passengers Booked through to all principal points and AROUND THE WORLD.

Return tickets to various points at reduced rates, Good for 4, 6, 9 and 12 months. SPECIAL RATES (First class only) granted to Missionaries, Members of the Naval Military, Diplomatic and Civil Services, and to European Officials in the Service of China and Japan Governments.

The attractive features of the Company's route embrace its PALATIAL STEAMSHIPS. (second to none in the World), the LUXURIANCE OF ITS TRANS-CONTINENTAL TRAINS (the Company having received the highest award for same at recent Chicago World's Exhibition), and the diversity of MAGNIFICENT MOUNTAIN AND LAKE SCENERY through which the Railway passes.

THE DINING CARS and MOUNTAIN HOTELS of this route are owned and operated by the Company, and their appointments and Cuisine are unexcelled.

prove to be what they were said to be, -- how

hate to be deceived; especially when the decep-

tion is intentional. But all men are not liars,

even if David did say so in his haste. If they

were society would be impossibile. Everybody

knows that business is based on credit, on

faith. Millions are bought daily on nothing

more solid than the pledged promises of men,

-not written, merely verbal. The Stock Ex-

changes are often called nests of gamblers, yet

nowhere is a promise held in greater honour.

Therefore when we say that the tried and

effective modern remedy called "Wampole's

Preparation " never deceives any who resort to

it in hope of benefit and cure, we may expect

to be believed: For this assurance is given on

what it has done in the past in countless

cases, on its record. It is only recom-

mendell to accomplish what it was made to

accomplish. Its action in Chlorosis, Anemia,

In Grippe, General Debility, Throat and Lung Troubles, Blood Impurities, etc. is convincing.

It is palatable as honey and contains the nutri-

tive and curative properties of Fure Cod Liver

Oil, extracted by us from fresh cod livers, combined with the Compound Syrup of

Hypophosphites and the Fxtracts of Malt and

Wild Cherry. Dr. Austin D. Irvine, of Canada,

says: "I have used it in cases where cod liver

oil was indicated but could not be taken by the

patient, and the results following were very

gratifying." It is effective fron sensitive and

nervous stomachs. It cannot deceive or dis-

appoint you, and comes to the rescue of those

of the age. Sold by all chemists here.

GENERAL BOOTH MAY VISIT HONGKONG.

"MANUFACTURED MESSIAHS."

A great shout of "Amen" filled Exeter Hall the other night when General Booth, his furrowed face nearly as white with excitement as his snowy hair and beard, appealed to the faith of the thousands gathered to bid him farewell previous to his embarking on a 25,000 miles tour to Canada and the United States.

Flinging his arms aloft, the General said: The "old religion-Hallelujah! We don't make and we don't manufacture. Messiahs." This bit, at the ex-Salvationist Messiah of Clapton, was greeted with loud laughter and cheers. "And we are not equal to the task of growing 'Elijahs,'" shouted the General, and the Salvationists laughed again at the thrust at Dr. Dowie, the "Elijah" of America, who is causing some trouble in the Salvationist camp there.

He was going to America to inspect. Some people did not like inspection, and wanted to be a law to themselves. Rumours of wonderful things that were being done in the States

reached him. Some people threw him up with very little thought and reason. Some said, "We don't approve the way you manage the army." " I say," cried the General, " you all have to prove to me that your alterations are desirable. I am the judge, and by the army I am going to

It was true, he said, that one or two of his children had fallen from him, but what were his children more than anybody else's? "The Salvation Army does not belong to the Booth family," he added ironically, "and I am not the General of the family: I am the General of the

STERLING BALARIES.

At the recent Legislative Council meeting held in Singapore, the Hon C. Stringer on the question of Government salaries said that His Excellency would find that a protest had been entered against the paying of Government salaries in sterling. As he understood that the action did meet with the view of some. hon friends at his end of the table; he thought he would explain the attitude he had taken. up. He considered firstly that the change should have been introduced by a special resolution and so have been adequately discussed, and secondly that the whole state of the currency of the Colony was in an extremely difficult position. He could not bring himself to regard quietly a scheme by which members of the Government service should be sufficiently provided for, whilst the other people who lived and worked in Singapore were largely precluded from all chance of acquiring wealth owing to the state of the currency. In 1897 it would have been possible to fix the dollar on a 2/- basis. That opportunity had been lost through the inaction of the Government, and the subject now was of immensely greater difficulty owing to the enormous number of British dollars put in circulation since. If the larger scheme could be settled he believed that His Excellency's scheme was a very good one and would meet almost all cases, except perhaps

It treats the question from a naval, military, BABIES AND CHILDREN and hydrographical point of view, thus show-ing the deep interest taken in the subject, and should be fairly plump. They ought to put

on fat as fast as they use it up; for fat is fuel, and the burning of it makes power and force. Thin children-even along to the age of eighteen or twenty-are in danger from consumption, and from other wasting complaints. The children who starve, and the young men and women who are consumed-why, the very idea of it is frightful. For such as they there is always, what the Bible calls a "mighty famine" in the land. Food, though it may be taken plentifully, does not nourish them. It makes no fat; it gives no strength. To prevent this, to cure this, to save the young ones at the mother's knees, and the bright boys and girls who are just looking at the world with hopeful and ambitious eyes, is the

WAMPOLE'S PREPARATION.

Its success is decided and settled. Thousands owe to it life and health. It is palatable as honey and contains the nutritive and curative properties of Pure Cod Liver Oil extracted by us from fresh cod livers, combined with the Compound Syrup of Hypophosphites and the Extracts of Malt and Wild Charry. In building up pale, puny, emaciated children, parti-. cularly those troubled with Anemia, Scrafula, Rickets, and bone and blood diseases, nothing equals it; its tonic qualities are of the highest order. Parents whose children are sick cannot resort to it a day too soon. A Medical Institution says: "We have used your preparation in treating children for coughs, colds and inflammation; its application has never failed us in any case, even the most aggravated bordering on pneumonia. The children live it, they love the taste of it, it looks good to them, and it builds up their bodies; many little children owe their lives to it." The more it is used the less will be the ravages of disease among the people from infancy to old age. Every dose effective, "You cannot be disappointed in it." At all chemists and A. S. THE KOWLOON RESERVATION

We have seen it expressed in public print that some satisfaction is felt in a concession made by the Secretary of State for the Colonies respecting a European reservation for Kowloon. Interpreting the despatch, 20 recently published in our columns, in the light of our information we, would regard-i as a correct exposition of policy of British administration in our Cólonial possessions. The sum and substance of the despatch is that, while it is deemed advisable to establish a reservation in which persons of a cleanly and healthy mode of life will be safe from the risk of infection due to the neighbourhood of lower classes of Chinese with insanitary habits, this reservation should not be secured to the exclusion of Chinese of good standing. Opinion among the Chinese is freely expressed that no invidious distinction should be chawn so as to create any racial prejudice different nationalities as Hongkong assuredly is. .: Were a reservation area to be set apart entirely for the benefit of the Europeans then the Chinese of the better class would be forced to reside in a district where the inhabitants of the lower social stratum would have the right of intruding themselves upon their countrymen of the higher order. This is manifestly not desirable. Equal rights for al is, in sifort, the principle which they claim It is held by them that in the reservation not only should Chinese of the better class be allowed to reside, but tifat all classes of houses of European design within the reservation might be open for the Chinese to inhabit if they chose to pay the rents and conform to the sanitary laws with regard to cleanly habits and healthy living. The contention that the Chinese are willing and are able to pay higher rents to the exclusion of Europeans in Hongkong should not, in to the acquisition of any site for residential purposes by them so long as they satisfy the requirements of civil and municipal government. We hold that contention to be perfectly right and sound in principle, and the interpretation of Mr. Chamberlain's despatch, of the 4th September last, dealing with the question of the European reserin the spirit and should be made to hold good in practice. The question of racial distinction is 'one peculiarly liable to creep into discussions of public moment wherever European and Chinese interests are both concerned, and we should deprecate the laying down of any hard and fast rule by which our native fellow-citizens would be made to endure any hardship.or privation at the cost of comfort and luxury to ourselves.

It's walls are not thickly built while the garrison is very small. In consequence it almost fell into the hands of the rebels and the gates were closed for several days about the middle of last month, till the Taotai of Chaoching-fu despatched two battalions of troops to the city. Apparently there was no unity among the rebels, as they fled upon the appearance of the troops, thus the siege was raised. They then went into Kaichien District, and were about to attack the city, therefore the authorities have telegraphed to the Chaoching Taotai for succour. ...

SIR ERNEST'S INDIGNATION :-- According to a leking wire, dated 1st inst, it is reported that the British Minister to Peking asked Prince Ching some time ago if there was not some clause in the draft of the agreement for the evacuation of Shanghai which the Chinese Government was about to sign with Germany, and that Prince Ching redied definitely in the negative. A few days afterwards the Prince signed that agreement, which is very disadvantageous to Great Britain. On the Butish Minister hearing of the issue of the affair he strongly denounced Prince Ching for his deceitfulness. Sir Ernest Satow declared he would have nothing to do with the Shanghai evacuation pr pos. SWAMPS AT CADOGAN ST. KENNEDY TOWN.

DANGER TO THE COLONY

The following recommendation, signed by Hon. Dr. E. Clark, M. O. H. and addressed to the Secretary of the Sanitary Board was laid.

on the table at the afternoon's meeting:-I beg to recommend that the Board should igain direct the attention of the Government to the swamps at the South end of Cadogan Street, Kennedy Town, referred to in Sanitary Honrd letter No. 190 of December 21st, 1900 and in C. S. O. letter No. 167 of January 231d,

In connection with these papers I called dication on January 25th 1901 to a flourishing water-cress bed in this locality, which was an undoubted source of danger as regards malaria to the Board's officers and servants at the Sheep and Swine Depots and the Slaughter houses, and which would be an equal source of danger to the inmates of the new Tung Wah Infectious Diseases Hospital.

I do not know what title the market gardner has to the land in this locality, but there can be no question that it is a most unsuitable one for such a purpose and that in the interests I the health of the Board's officers and servants the swamp should be drained without delay and the market gardener removed.

THE MISSING "CAMORTA."

MARINE COURT OF ENQUIRY.

. In compliance with orders i such by the Burma Government, a Special Marine Court of Enquiry assembled recently to record evidence as to the probable circumstances which caused the B I.S N., Company's steamer Camorta to founder in the cyclone of the 5th of May, 1902, on the Biragua Flats, in 16 fathoms of water, while on her voyage to Rangoon from Calingapatam, which port she left on the 2nd idem. ..

.. The court recorded the following finding upon the eviden eli-The so'e question which we have to decide is whether the wreck which has been located at latitude 15 deg. 27 min. 4 sec. N. and longitude 94 deg. 45 min. is that of the s.s. Comort; or not. The s.s. Camorta belonged to the British India Steam Navigation Company, and was on the run between Rangoon and Cocoanada, a voyage that usually takes a fortnight. She last left Chlingapatam at traim, on the 2nd of May, 11902, and has not been heard of since. A cyclone occurred on 5th of May, and it is surmised that she was lost in that cyclone. There can be no reasonable doubt that the vessel was lost. It appears that she would probably meet-the cyclone about 4 a.m. on the 5th of May, and the spot at which the wreck has been discovered aggresponds with the position in which the Camoria wou'd probabl - be about that time. The week is in the regular line of direction taken by vessels bound for Rangoon. In addition to this, the masts of the wreck are the same distance apait as those of the Cumort i, and on the explosion of a mine by the officers of the R. I. M. S. Dalhousie, some casks of caster oil were floated. The Canoria was cerrying 64 of these as portion of her cargo. The only two vessel+ known to be lost are the Hermon from Bombay and the Camorta. The former was carrying a stone cargo only. Under the circumstances we are of opinion that there can be no reasonable doubt but that the wreck is that of the Camorta. It is impossible to determine the cause of the disaster. Slie was in perfectly good order, and a seaworthy vessel in every way.

POITAM & CO. FOR SUMMER

AS OTHERS SEE US.

Writing under the nom de plume of "Man darin," a correspondent has sent the following sketch of Hongkong to the Rangoon Times :-The first view of the island of Hongkong, on nearing it, either from the south or west, is an extremely beautiful one.

The island is the centre, and principal one, of a group situated close to the mainland o China, of which the adjoining province is that of Kwanglung.

To the traveller arriving from the west, and who has visited India, Burma or the Straits, p noticeable difference will be apparent in the aspect of the coast . In place of the low, swampy and palm-fringed shores that meet the gaze on nearing the coasts of India, Ceylon or the Malay Peninsula, he will now see bold and rugged cliffs against which the sea dashes its angry waves. Beyond the islands the outline of the mainland itself is discernable with ranges of hills bordering the coast line. In place of palms and tropical vegetation rocky and arid country alone is visible and although on nearer approach a certain amount of vegetation may be noticed on the spurs and ravines, this vegetation is not of a tropical nature, but consists largely of stunted pine trees, and others

usually found in temperate zones. The general view of the coast, with its

BARE AND ROCKY HILLS, burnt as they are to a reddish brown, calls to mind at once the appearance of the African coast line on the southern littoral of the Mediterranean. The same blue haze that is a feature of the landscape on the northern coast of Africa also obtains here, and adds to the resemblance, and the distant view of the land, rugged though it is, is beautiful in the extreme.

After passing several outlying islands, which to all appearance are desert and unpopulated, the i land of Hongkong is approached. This presents, even from the seaward side, a considerable difference to those already passed. The island at first glance seems to rise abruptly from the sen, and to culminate in

ONE LOFTY PEAK, which rears itself for over 1, on feet above the level of the ocean, but as a matter of fact the island consists of a succession of hills with valleys and ravines intersecting them.

The island is divided from the mainland by an arm of the sea about three-quarters of a mile in width, and this arm, ex ending as i does for some thice or four miles in length before opening again to the east, f rms the harbour and road tead of Hongkong, a natural harbour of a size to hold all the navies of the world and of such importance from a mercantile point of view as to rank amongst the first of trading ports in either hemispheres. On turning eastward into the harbour, the first view of the town and porthis obtained. Un the island itself the town of Victoria is built and extends from the water's edge to half way up the hills, on the summits of which moreover several how es exist, many of the finest residences in the colony being situated in this elevated position.

The town of Victoria is an admirably designed and built one [?—Ed., 11.K. ..] A broad and commodious roadway runs along the sea front, a large portion of which has been reclaimed of late years only. Facing this roadway, which is called the Praya,

LARGE PUBLIC BUILDINGS line the way, most of which are of midern design and crection. The mo e noticeable of Hong ong Club, the Telegraph Company's ing both European and Chinese shops, the Post & flice, several banks, and a large number

The Chinaman of Hongkong is a very different person to those of his nationality who have made their homes in other countries. Here he is on his native heath and he shows it plainly in various ways. large portion of the trade of the colony is entirely in their hands and the total amount of capital influenced by them bulks very large. YORSE PLACES THAN HONGKONG

Several of the leading steamship companies are wholly Chinese, while the fleets of junks that crowd the bay and harbour, and which carry out the local trade, are all in the pay of one or two of the larger native firms. The Chinese of the towns are traders, as had

been already remarked, but the country people from the outlying portions of the island and from the mainland are frequent visitors to the town. It is by these that the excellent supply of flowers and vegetables is raised and brought into market daily. The vegetables are of every kind, both European and Asiatic, and are excellent of their kind, while the proficiency of the Chinaman as a gardener is too well known to call for remark, but the

ARRAY OF BEAUTIFUL EXOTICS and cut flowers exposed for sale daily in the principal streets strikes the traveller with admiration. The price of these flowers too is ridiculously small, a most exquisite bouquet of freshly cut blossoms being purchisable for a few cents. In the same way the private gardens attached to the larger houses exhibit the Chinaman's skill in the art of horticulture, and every garden teems with rare flowers of perfect development, while many of them possess turf lawns that would not disgrace an English country house. All this is the work of the Chinese mali, who unlike his Indian confrere takes the greatest pride in the state of his garden, and without the slightest prompting from his master will quickly design and fill numerous flower beds, of most artistic construction and arrangement.

Hongkong possesses A YERY FAIR RACE-COUPSE! and rolo ground, in spite of the lack of level ground on the island. The former is situated within what is known as the Happy Valley and the latter is below it and nearer the sea On both ponies and horses enjoy the luxury of of galloping on real sound turf, with a spring

in it, not usually found out of the British Isles. Taken in all there are many worse places than Hongkong, few that equal it in scenicattraction. The mountains, the blue waters of the bay, and the white stone houses, clustering one above the other, resemble in many ways a Mediterranean coast town, while the climate, although hot and disagreeable for some four months yearly, gives one nothing to complain of during the remaining eight, of which at least four are really cold, so much so indeed as to render fires and warm clothing an absolute
